

Gabriel Bernardo Bastos

Backend Developer & Automation Engineer

Rio de Janeiro, Brazil | Open to Remote

gbbastos99@gmail.com | +55 21 98253-0799 | linkedin.com/in/gbbastos | github.com/gbbastos | gbbastos.github.io

Professional Summary

Backend developer and automation engineer with professional experience in Python and C#/.NET, specializing in web scraping, web crawling, and automation workflow development. Proven track record maintaining and scaling a fleet of over 100 production automation systems. Experienced in backend integrations via REST APIs, database operations with MongoDB and SQL, and deploying applications to Windows Server environments. Seeking remote backend or scraping-focused engineering roles.

Experience

Backend Developer & Automation Engineer

Jan 2025 – Present

Iprazos

Rio de Janeiro, Brazil (Remote)

- Maintain and stabilize a production fleet of **100+ web crawlers and automation systems** built with C#/.NET and Selenium.
- Develop new automation workflows integrating REST APIs and HTTP-based data pipelines.
- Develop browser automation using **Selenium** and **Playwright** for dynamic and JS-heavy websites.
- Manage deployments to Windows Server, executing and monitoring .NET DLL processes in production environments.
- Perform operational analysis and troubleshooting using **MongoDB** and **SQL** databases.
- Monitor and validate **RabbitMQ** message queues to ensure pipeline integrity and system health.

Software Development Intern

2023 – 2024

PUC-Rio — Ignição Petrobras (EOA Program)

Rio de Janeiro, Brazil

- Developed data prediction projects applying Python and data science methodologies to real-world datasets.
- Built Generative AI experiments integrating the OpenAI API (GPT) into internal research workflows.
- Collaborated on a research program focused on applied data science and AI solutions.

Programming Logic Instructor & Teaching Assistant

2020 – 2022

Federal University of Rio de Janeiro (UFRJ)

Rio de Janeiro, Brazil

- Invited to join as instructor after top performance in the Python programming course.
- Taught programming logic and Python fundamentals to undergraduate students.
- Designed lesson plans, exercises, and assessments; provided individual tutoring and support.
- Contributed to the development of an internal library built with Pygame to support teaching activities.

Projects

PromoGamer API

github.com/gbbastos/Promo-Gamer-API

Python, FastAPI, MongoDB, Playwright, APScheduler

- REST API that aggregates free games and deals from Epic Games, Steam, and GOG using their public APIs.
- Stores results in MongoDB with upsert logic; auto-refreshes every 6 hours via background scheduler.
- Exposes filtered endpoints by platform, deal type, and discount percentage with pagination support.

PriceWatch API

github.com/gbbastos/pricewatch-api

C#, ASP.NET Core, MongoDB, Playwright

- Price tracking REST API that monitors Mercado Livre products and alerts when prices drop to a target value.
- Playwright-powered scraper runs automatically every 6 hours via .NET **BackgroundService**.
- Full price history stored in MongoDB with alert filtering and on-demand manual price check endpoint.

Education

B.Sc. in Computer Science

Universidade Veiga de Almeida (UVA)

2025 – Present
Rio de Janeiro, Brazil (Online)

Programming Logic in Python

Federal University of Rio de Janeiro (UFRJ)

2019

Technical Skills

Languages: Python, C#

Frameworks & Libraries: .NET, ASP.NET Core, FastAPI, Selenium, Playwright

Web Scraping & Automation: Selenium WebDriver, Playwright, HTTP integrations, headless browsing, automation workflow design

Databases: MongoDB, SQL

Infrastructure & Deployment: Windows Server, Linux, Git, GitHub, Oracle Cloud

Familiar With: RabbitMQ, REST API design, HTML, CSS

Practices: Agile/Scrum, SOLID principles, production support, CI/CD concepts

Languages

Portuguese — Native | English — Professional
